

Diversity of the Governing Board information September 2023

Collecting and publishing governing board diversity data [DFE guidance 2023](#)

“Diversity is important and we want governing boards to be increasingly reflective of the communities they serve.

We encourage schools to collect and publish governing board members’ diversity data. Information should be widely accessible to members of the school community and the public. Board members can opt out of sharing their information, including protected characteristics, at any given time including after publication.

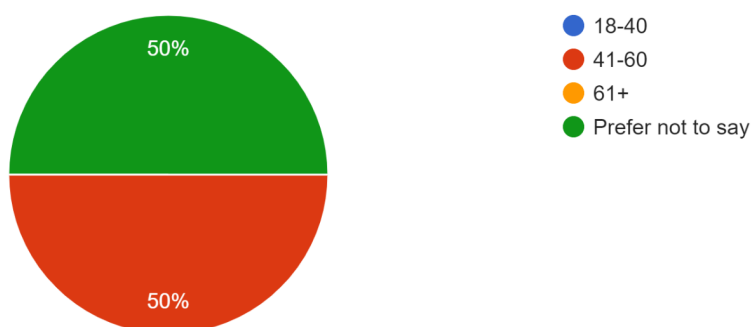

Schools must ensure that individuals cannot be identified through the publication of data, particularly when board member levels are low.”

National Governance Association guidance 2023

“Not all diversity information will be relevant to publish – as a starting point, we recommend boards report on the age, gender and ethnicity of their membership although other data may be relevant depending on the characteristics of your local community.”
